

V110 Installation Template

Review all local building codes. Wear proper safety equipment.

INSTALLATION TEMPLATE V110 Level Railing with Square or Turned Vinyl Balusters

1. If using optional Post Trim Ring tear template at line shown in Fig. 1.

2. Insert Brackets into template per the desired rail height – middle bracket hole location for 36" high railing, top bracket hole location for 42" high railing.
3. Use a rubber band or hand clamp to hold Installation Template tight to post.
4. Install three (3) #8 x 1-1/2" screws per bracket in bracket holes. **TIP:** Start with center screw to maximize bracket adjustability.
5. Remove Installation Template and repeat on opposite post.
